U.S. DEPARTMENT OF ENERGY | Energy Efficiency & Renewable Energy

Wind Economic Development

Wind Powering America is a nationwide initiative to educate, engage, and enable critical stakeholders to make informed decisions about how wind energy contributes to the U.S. electricity supply.

Wind Powering America provides economic development information and models to help individuals, developers, local governments, and utilities make decisions about wind energy projects.

At the Wind Powering America website, you will find information about:

- The Job and Economic Development Impacts (JEDI) model
- The Small Wind Economic Model
- Wind Energy Finance, an online calculator
- Economic impact studies.
